

## **Process SKIDS & Control Panels**

**Your Partner in Precision Engineering: Fabricating Excellence for the Oil and Gas Industry**

At **MERLA**, we specialize in the design, fabrication, and delivery of high-quality **process modules and skids** tailored to the demanding needs of the oil and gas industry. With a commitment to precision, efficiency, and innovation, we provide end-to-end solutions that ensure optimal performance, safety, and reliability in the harshest environments.

## What We Offer

### 1. Custom Fabrication:

1. Modular process systems designed to your exact specifications.
2. Seamless integration with your existing infrastructure.
3. Built to meet global standards such as ASME, API, and ISO.

### 2. Comprehensive Solutions:

1. Oil and gas Chemical Injection, separation, pump packages, LACT units, and more.
2. Fully equipped with instrumentation, piping, and control systems.
3. Minimal onsite assembly.

### 3. Engineering Expertise:

1. Skilled in 3D modeling and detailed engineering.
2. Experience with complex process requirements and offshore applications.
3. Collaborative approach to ensure project success.

### 4. Global Standards Compliance:

1. Certified fabrication processes.
2. Stringent quality assurance and testing

**Chemical Injection Packages**

**Water Treatment Package**

**Hot Oil Systems**

**High Pressure Steam Metering Skid for  
Custody Transfer**

**Natural Gas Custody Transfer**

**Mobile Test Separator for Onshore Well**

**Water Custody Transfer Service**

**Produced Water Treatment System**
